

Ball / Land Grid Array Sockets

Knob Lock Type

E-tec is now the leading BGA socket manufacturer.

EP patents 0829188, 0897655 US patents 6190181, 6249440 Patented in other countries.

Knob lock sockets are designed for easy handling and where a high number of chips insertion / extraction cycles is required. The SMT socket is simply placed and reflowed onto the PCB in the same way as the chip and occupies only a small amount of additional board space. The 1.27mm pitch knob lock socket extends ≈ 6.00mm beyond the outer ball row with no fixing holes. Not all grid sizes and pitches are available in knob lock style and in some cases a mechanical attachment to the PCB may be required. Therefore always contact E-tec for availability first.

We aim to solve your requirements - many different terminals and configurations are available. Your custom sets our standards!

Please note, we will always request the chip data to ensure we offer a compatible socket.

Important Note:
Please check the ball diameters & heights of your chip prior to ordering the standard E-tec BGA (BCK, BPK) sockets. Any deviation has to be communicated to E-tec in order to check compatibility with the standard socket design and if necessary to obtain a special order code adapted to your chip dimensions.
The standard solderball diameters & heights are the following:

Pitch	ball diameters min/max	ball height min/max
0.50mm	0.25mm / 0.35mm	0.15mm / 0.30mm
0.65mm	0.25mm / 0.45mm	0.15mm / 0.30mm
0.75mm	0.25mm / 0.45mm	0.15mm / 0.40mm
0.80mm	0.40mm / 0.55mm	0.25mm / 0.45mm
1.00mm	0.50mm / 0.70mm	0.30mm / 0.50mm
1.27mm & 1.50mm		
a) plastic chips (BPK)	0.60mm / 1.00mm	0.50mm / 0.70mm
b) ceramic chips (BCK)	0.60mm / 1.00mm	0.80mm / 1.00mm

If the minimum ball diameter of a given chip falls below the above indications, then a BUK socket will generally be proposed.

Specifications

Mechanical data	Electrical data
Contact life	10.000 cycles min.
Retention system life	10.000 cycles min.
Solderability	exceeds MIL-STD-202 Method 208
Individual contact force	40 grams max.
Material	
Insulator (RoHS compliant)	High temp plastic or epoxy FR4
Terminal (RoHS compliant)	Brass
Contact (RoHS compliant)	BeCu
Electrical data	
Contact resistance	< 100 mΩ
Current rating	500 mA max.
Insulation resistance at 500V DC	100 MΩ if 0.50 to 0.80mm pitch 500 MΩ 1.00mm pitch upwards
Breakdown voltage at 60 Hz	500V min.
Capacitance	< 1 pF
Inductance	< 2 nH
Operating temperature	-55°C to +125°C ; 260°C for 60 sec.

Recommendations
For Knob Lock version only solder without retainer.

Solder paste: Please use a solder paste w/o any silver!
Solder profile: Please refer to our website www.e-tec.com

How to order

X X K **x x x x** - **xx** **xx** - **xx** **XX** **xx** **L** ← optional for locating pegs
